

光纤保护空管 Fibre Protected Tube

光纤保护空管是中空挤制一层透明缓冲材料而成,光纤可轻松穿过。

Fanout tube extruded a layer buffer material, fibre can easily pass through the tube.

● 产品特点 Characteristics

- 1.几何尺寸一致性好, 穿纤性能良好 High uniformity geometric dimensioning, easy for fibre to pass through
- 2.温度特性稳定, 后收缩小 Excellent temperature performance, low post shrinkage
- 3.特殊结构可定制 Special dimension available on request

● 应用范围 Applications

光器件配件 Optical component parts

规格 Spec	外径 Outer diameter	重量 Mass	一次穿纤长度 Fibre pass through length in one operation
	mm	kg/km	m
Fanout Tube	0.7	0.35	> 2
Fanout Tube	0.9	0.45	> 4
